Science in our daily life

(1) Introduction → We are living in the age of science. Science plays an important part in our daily life. It has made impossible things possible. It has brought the dreams and imagination of man true. By observation of simple events man has invented great things. Science has changed the life style of man.

1/40 के अंक का योग

It has made our life easier and more comfortable.

(2) Scientific Inventions → There are

many scientific inventions that have made our life easier and comfortable.

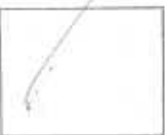

Electricity is the greatest invention of science. It serves us in many ways.

It lights our houses. It entertain us with T.V. and radio.

It runs trains, mills and factories. It cool and

warms our houses. It fills our water. Thus, modern life is impossible without Electricity.

(3) Means of transport and Communications → Buses, cars, trains, aeroplanes have made our travel easier, comfortable and quicker. A man can reach any part of the world within hours. He had reached other planets with the help of rockets. With the introduction of S.T.D. and I.S.D. we can talk to our friends and relatives living very far from us.

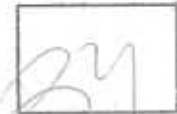

(4) Medicine and Surgery → Science has cured man from very dreadful diseases. T.B. and cancer have been controlled. As science is making progress the death

+

P

State is falling due to better medical facilities. While the birth rate is increasing. Penicillin, chloromycetin, vitamins and other medicines help to cure many terrible diseases. It has made man healthier. In the field of surgery too science has done wonders. Open-heart-surgery and heart-transplantation have become possible. In fact, science has given eyes to blind, ears to deaf and organs to handicapped.

(5) Agricultural help → Science has also helped in agriculture and industry. It has invented tractors, tube-wells, chemical-fertilizers.

योग पूर्व पृष्ठ

+

पृष्ठ 16 के अंक

=

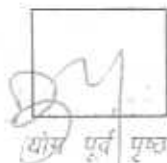

कुल अंक

etc. With the help of tractor farmer can plough their lands, sow seed and reap their harvest quickly and easily. They can water their lands by tube-wells. Chemical Fertilizers are useful for growing such crops. Plant diseases are now checked with the help of medicines.

(6) Computers → Scientist has invented computer. These are wonderful inventions. The computer can do complex calculation and solved a lot of problems in some seconds. They can work quickly. Now, the computer ^{has} entered in the every field of life.

+

=

(7) Disadvantages → Everything has two sides.

Science has dark side also. Science has given us atom bombs.

They can destroy big cities and villages and killed a lot of persons in some seconds.

They can bring about the end of humanity within a very short period of time.

Hiroshima and Nagasaki still regulate the sad saga of devastation. So its rightly been said that science is a good

servant but a bad master.

The world is sitting on volcano.

Any brute like Hitler or

Osama-Bin-Laden may make

it erupt any time. The following

statement are true:

Maxmullay "Science has taught

us to fly like birds in the

sky and swim like fish in the

water but it has not taught

B
S
E

=

कुल अंक

us how to walk on the earth" 93

J. Patison "The third world war
will be fought with
bombs and missiles and the
fourth will be fought with
arrows and stones."

(8) Conclusion → Science has proved
a great asset
of modern man. If properly
used it can make the
life of man healthier and
happier. We should use the
science for the welfare
of mankind. Man is called
'Master of the world'
because of science.

Ans(13) (i) There are two kinds of poverty in india

(A) The apparent poverty.

(B) The real poverty.

(ii) The apparent poverty is caused by a change in the ~~need~~ mode of living.

(iii) A man feels poor when he cannot afford to purchase fashionable things for himself and his family.

(iv) ~~The cause of the rise of real poverty is~~

(v) There is also a real poverty of which the immediate cause is the ~~rise~~ in the prices of food stuffs and of clothes.
